PROFILE

DevOps Engineer with expertise in Kubernetes, CI/CD automation, and cloud infrastructure (AWS/GCP). Proven track record of optimizing deployments, ensuring high system availability, and improving scalability through Infrastructure as Code and containerized solutions. Experienced in monitoring, incident response, and implementing security best practices.

SKILLS

DevOps & Cloud	Kubernetes (EKS, GKE), Docker, Jenkins, Nginx, Apache, AWS (EC2, ECS, VPC, RDS, IAM), GCP
Monitoring & Observability	Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana)
Security & Performance	CSF, LFD, Fail2ban (Docker), Load Balancing
Infrastructure as Code	Terraform, Helm, Ansible
Programming & Automation	Bash, Python, Git
Databases & Messaging	MySQL, MongoDB, Redis, Kafka

PROFESSIONAL EXPERIENCE

Airpay Payment Services Private Limited <i>DevOps Engineer L2</i>	Jan 2026 - Present <i>Mumbai, India</i>
- Managing highly available Kubernetes infrastructure supporting production payment gateway systems. - Ensuring PCI-DSS compliance and SOC (SOC 1, SOC 2) audit readiness for financial workloads. - Designing high availability architecture with load balancing, auto-scaling, failover mechanisms, and zero-downtime deployments. - Handling P1/P2 production incidents, performing root cause analysis (RCA), and improving system reliability. - Managing secure banking integrations and payment partner connectivity with strict SLA requirements. - Implementing centralized monitoring and alerting using Prometheus, Grafana, and log aggregation tools to reduce MTTR. - Automating CI/CD pipelines for containerized microservices with rollback and environment-based configurations. - Strengthening container security, network policies, firewall configurations, and access control across environments.	
Support Hives Technology LLP <i>DevOps Team Lead</i>	Nov 2023 - Jan 2026 <i>Mumbai, India</i>
- Optimized CI/CD pipelines using Jenkins and Git, reducing deployment time by 40%. - Automated AWS infrastructure provisioning with Terraform for zero-downtime deployments. - Implemented Prometheus and Grafana monitoring stack, reducing incident response time by 30%. - Managed Kubernetes workloads (EKS) using Helm charts for scalable microservices.	
Support Hives Technology LLP <i>DevOps Engineer</i>	Mar 2024 - Dec 2024 <i>Mumbai, India</i>
- Maintained CI/CD pipelines and Dockerized services for AWS and GCP deployments. - Resolved infrastructure issues and collaborated with developers for smooth releases. - Enhanced monitoring, alerting, and infrastructure scaling strategies.	
Support Hives Technology LLP <i>DevOps Intern</i>	Nov 2023 - Feb 2024 <i>Mumbai, India</i>
- Assisted in setting up development and staging environments using Docker and CI/CD. - Gained hands-on experience in server management, log analysis, and deployments.	

PROJECTS

NAS on Raspberry Pi with Services

- Built an IoT-based NAS system with Docker containerization.
- Deployed Plex Media Server, containerized web server, and Portainer for management.
- Implemented secure remote access and storage solutions.

GenS Deployment

- Set up and managed full-stack deployment integrating Laravel, Django, and React environments.
- Designed scalable and secure infrastructure using Nginx and containerized services.

WhatsupGoa Deployment

- Deployed and managed Django-based platform infrastructure.
- Optimized performance, database tuning, and monitoring setup.
- Ensured uptime using Nginx, security hardening, and monitoring solutions.

Disaster Management System

- Managed 30 Jenkins jobs simultaneously on a 20-core dedicated server.
- Developed custom Bash scripts with Docker to achieve zero downtime across services.

Self-Hosted VPN

- Deployed containerized OpenVPN server for secure remote access.
- Designed private and encrypted network traffic architecture.

EDUCATION

M.Sc Computer Science Patkar Varde College, Mumbai	2022 - 2024
B.Sc Computer Science Bharatiya Vidya Bhavan, Mumbai	2019 - 2022
