PROFILE

DevOps / Platform Engineer with hands-on experience running high-availability Kubernetes infrastructure for regulated financial systems, including PCI-DSS and SOC 1/2 compliant production environments. Skilled in Infrastructure as Code, CI/CD automation, observability, and incident response, with a focus on site reliability, security, and zero-downtime operations for payment platforms processing live financial transactions.

SKILLS

DevOps & Cloud	Kubernetes (EKS, GKE), Docker, Jenkins, Nginx, Apache, AWS (EC2, ECS, VPC, RDS, IAM), GCP
Monitoring & Observability	Prometheus, Grafana, ELK (Elasticsearch, Logstash, Kibana)
Security & Compliance	PCI-DSS, SOC 1/2, CSF, LFD, Fail2ban, Load Balancing
Reliability & Incident Response	HA Architecture, SRE Practices, RCA, Zero-Downtime Deployments
Infrastructure as Code	Terraform, Helm, Ansible
Programming & Automation	Bash, Python, Git
Databases & Messaging	MySQL, MongoDB, Redis, Kafka

PROFESSIONAL EXPERIENCE

Airpay Payment Services Private Limited <i>DevOps Engineer L2</i>	Jan 2026 - Present <i>Mumbai, India</i>
- Operate highly available Kubernetes infrastructure supporting a live production payment gateway, maintaining near-zero unplanned downtime for services processing real-time financial transactions. - Ensure PCI-DSS compliance and SOC 1/2 audit readiness across financial workloads handling sensitive payment data. - Design high-availability architecture – load balancing, auto-scaling, failover mechanisms, and zero-downtime deployments – for mission-critical banking systems. - Lead root cause analysis (RCA) and resolution for P1/P2 production incidents, driving continuous improvements in system reliability. - Manage secure banking integrations and payment partner connectivity under strict SLA requirements. - Run centralized monitoring and alerting (Prometheus, Grafana, log aggregation) to surface and resolve issues before they affect live transactions. - Automate CI/CD pipelines for containerized microservices, with rollback support and environment-based configuration management. - Harden container security – network policies, firewall configuration, and access control – across all environments.	
Support Hives Technology LLP <i>DevOps Team Lead</i>	Jan 2025 - Dec 2025 <i>Mumbai, India</i>
- Optimized CI/CD pipelines using Jenkins and Git, reducing deployment time by 40%. - Automated AWS infrastructure provisioning with Terraform for zero-downtime deployments. - Implemented Prometheus and Grafana monitoring stack, reducing incident response time by 30%. - Managed Kubernetes workloads (EKS) using Helm charts for scalable microservices.	
Support Hives Technology LLP <i>DevOps Engineer</i>	Mar 2024 - Dec 2024 <i>Mumbai, India</i>
Maintained CI/CD pipelines and Dockerized services for AWS and GCP deployments.	

- Resolved infrastructure issues and collaborated with developers for smooth releases.
- Enhanced monitoring, alerting, and infrastructure scaling strategies.

Support Hives Technology LLP

DevOps Intern

Nov 2023 - Feb 2024

Mumbai, India

- Assisted in setting up development and staging environments using Docker and CI/CD.
- Gained hands-on experience in server management, log analysis, and deployments.

PROJECTS

NAS on Raspberry Pi with Services

- Built an IoT-based NAS system with Docker containerization.
- Deployed Plex Media Server, containerized web server, and Portainer for management.
- Implemented secure remote access and storage solutions.

GenS Deployment

- Set up and managed full-stack deployment integrating Laravel, Django, and React environments.
- Designed scalable and secure infrastructure using Nginx and containerized services.

WhatsupGoa Deployment

- Deployed and managed Django-based platform infrastructure.
- Optimized performance, database tuning, and monitoring setup.
- Ensured uptime using Nginx, security hardening, and monitoring solutions.

Disaster Management System

- Managed 30 Jenkins jobs simultaneously on a 20-core dedicated server.
- Developed custom Bash scripts with Docker to achieve zero downtime across services.

Self-Hosted VPN

- Deployed containerized OpenVPN server for secure remote access.
- Designed private and encrypted network traffic architecture.

EDUCATION

M.Sc Computer Science

2022 - 2024

Patkar Varde College, Mumbai

B.Sc Computer Science

2019 - 2022

Bharatiya Vidya Bhavan, Mumbai
